

Summer School organised by the **Wroclaw University of Environmental and Life Sciences (UPWr)** offers **2-week-long courses on natural sciences**. The program is targeted at international students in their final years of master's programmes in natural sciences from foreign universities, who consider applying for a PhD programme after graduation.

In the 2022 edition you may choose between two courses offered to Summer School participants:

1. Horses as a topic of scientific research for everyone.

Covering topics like equine physiology and physiotherapy, molecular studies, cardiology and grasslands.

2. Dogs and cats in interdisciplinary scientific research.

Covering topics like oncology, cardiology, and reproduction.

Summer school dates:

July 4th – 8th, 2022 online lectures

July 11th – 15th, 2022 workshops on the UPWr campus in Wrocław, Poland

Registration deadline: May 31st, 2022

The summer school is **free** for successfully admitted participants. All students receive **scholarships** (around 1000 euros).

UPWr Summer School is a great opportunity to learn from top academics and gain hands-on experience in your field of interest. You will meet like-minded individuals from all over the world, discover new research opportunities and explore new places. There is no better way to make your summertime well-spent and unforgettable!
